TYPOSQUATTING

Robust protection against domain name impersonation while proactively preventing targeted phishing attempts worldwide.

INTELLECTUAL PROPERTY

Monitors your brand, potential cases of squatting or counterfeiting, and efficiently manages your domain name.

REPUTATION

Checks that your assets are not negatively listed (malwares, SPAM...) in blacklists/Threat Intelligence repositories worldwide.

AVAILABILITY

Ensures your services remain accessible, verifies the availability of systems and infrastructure, and calculates your SLAs.

CYBER & ATTACK SURFACE

Checks the hardening of your infrastructure and prevents application or server security vulnerabilities with power and confidence.

CONFIGURATION

Provides robust protection by monitoring DNS records and domain name integrity while proactively preventing targeted phishing attempts.

**Emergency ?
Need Help ?**

Entrust us with incident remediation: we can handle takedown requests for detected domain names, notify your providers, and deliver the necessary expertise.
